Engineered Transport Equipment
Manufacturer

COMPANY PROFILE

01 INTRODUCTION

Porter Rekayasa Unggul (“PRU”) is a leading manufacturer of superior-quality engineered transport equipment serving the coal, nickel and mineral mining industries as well as the oil & gas, agroforestry and transportation sectors. We focus on innovative design and robust engineering in addition to state-of-the-art manufacturing processes to bring you premium, customized, and durable products for use in mining and transport operations.

PRU custom engineers and manufactures a variety of off-highway hauling, transport, and support equipment including dump trucks, side-dump trailers, fuel and lube trucks, crane trucks, and low bed trailers. We are the sole Indonesian distributor and partner of Stellar Industries in Iowa, USA- manufacturer of work truck, hoist cables and the world’s only manufacturer of truck-mounted tire handlers. We are also able to fabricate custom products for you based on your needs.

PRU was founded with a mission to produce world-class quality transport equipment in Indonesia. Implementing first-rate engineering quality and teaching international manufacturing practices in Indonesia was no easy task. Our original vision of building exceptional-quality products backed by cutting-edge engineering still continues today. With that purpose in mind, we are continually committed to becoming the region's leading engineered transport equipment manufacturer giving our customers maximum productivity and durability for their units

VISION

To become the region's leading manufacturer of superior-quality engineered transport equipment.

MISSION

To serve you with top-of-the-line and reliable engineering solutions as well as innovative products to improve productivity and profitability.

To continuously improve our products to offer industry leading solutions for your transport and hauling needs.

PRU

PRODUCTS TO KEEP YOU
MOVING FORWARD

FACILITIES

PORTER REKAYASA UNGGUL's head office and workshops are located on the outskirts of Jakarta in Tangerang, Banten. PRU facilities include a Head Office, PRU workshops 1, 2, and 3, as well as a component manufacturing facility. All of our products are designed, engineered and manufactured in-house at our main office and production facilities. Our facilities consist of bending, cutting, and rolling machines as well as plasma laser cutters, milling machines and automatic robot welders. Additionally, we also house sandblasting facilities and painting facilities on premises to give our customers premium quality products they can trust.

02 HISTORY: PIONEERING THE INDUSTRY FORWARD

Porter Rekayasa Unggul ("PRU") was originally founded as Porter Rekayasa Utama in 1993. Founder and pioneer Susanto Hartanto, also founder of Geotama drilling, along with his British partner and sales manager Peter Holt, approached "Datuk" TK Low of Bayan Resources to domestically produce three units of bottom dump trailers and upon a successful tender, PRU was firmly established as the pioneer in engineered transport equipment manufacturing in Indonesia.

After a successful tender, Porter Rekayasa was founded as a PMA joint venture at the current location in Tangerang and started the domestic engineered transport industry. Utilizing knowledge and special welding techniques while also borrowing our namesake from our Australian partner Howard Porter, PRU began to engineer, manufacture and produce hauling trucks and other off-highway transport equipment. During this time all the welders were sent to Australia to bring back the knowledge to implement domestically.

By 1997, PRU's customers included Thies, Freeport, Petrosea, John Holland, Vale, Amman Mineral, Kaltim Prima Coal and Pectech as well as all the truck dealers in Indonesia. At this time PRU was the sole distributor of Palfinger cranes and had established Palfinger into a household industry name.

Because of the Asian monetary crisis and subsequent riots, Susanto moved his family to the United States. PRU continued to run until 2002 when the business was sold to Trakindo Group.

In 2009, after expiry of a non-compete agreement, former PRU employees approached Susanto to rebuild PRU. PT Porter Rekayasa Unggul was then founded on July 1, 2009 in the original location, this time as a fully domestic company. PRU continued to produce high quality products for its customers and retains a strong brand in the mining world.

A second, additional facility was completed in 2013 in Jati Uwung, Tangerang to accommodate the growing number of orders and by 2018 PRU was producing 400 units a year.

The Covid-19 pandemic of 2020 presented a significant challenge to the global economy, and we were not immune to its impact. However, this period also served as an opportunity for self-reflection and growth. With the return of PRU's original founder, our company embarked on a journey to revitalize operations and strengthen our foundations.

In 2021, PRU partnered with Stellar Industries to bring their truck-mounted tire handlers into the Indonesian market and also partnered with Isoli to distribute their line of recovery trucks.

Work on a third additional facility, starting in 2022, focused on producing specialty units including side dump trailers and featured an automated production division. With additional investments in machinery, equipment and new manufacturing processes, we begin another chapter in the PRU mission to provide world-class, industry-leading solutions for our customers.

03 ENGINEERING INNOVATION

Innovation has always been the cornerstone of our success. Since our inception, we have provided our customers with industry-leading, unparalleled solutions. Our highly regarded engineers are committed to providing the best, most effective and reliable solutions to help you succeed.

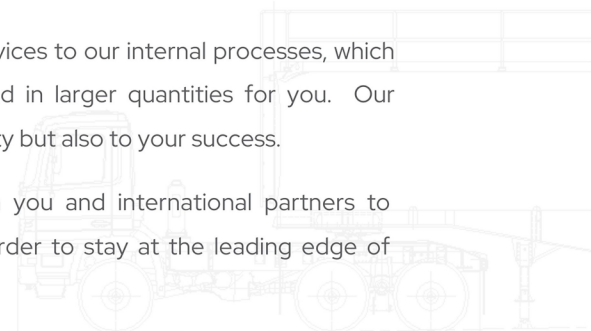

SUPERIOR ENGINEERING
FOR SUPERIOR
PERFORMANCE

PRU was originally founded as a PMA with Howard Porter of West Australia and with that knowledge and DNA, and now backed by 30 years of experience, PRU continues to craft and engineer industry-leading solutions for our customers. We are proud of our domestic production of world-class superior-grade engineered transport equipment that is made with rigorous engineering standards and best manufacturing practices. With several first-to-market products including our bottom dump trailers, side dump trailers, and 45m³ coal body units, and successful partnerships with renowned international brands, we stay committed to delivering our best for your needs.

PRU's commitment to excellence extends from our products and services to our internal processes, which are designed to find ways to deliver the best products quicker and in larger quantities for you. Our commitment to excellence extends not only to our products and quality but also to your success.

PRU's engineers are always ready to consult and collaborate with you and international partners to develop the best, most effective solutions for your operations in order to stay at the leading edge of innovation and bring industry-leading solutions to the market.

04 PRODUCT OVERVIEW

PRU's lineup of engineered transport equipment is designed for use in the mining, oil & gas, agroforestry and transportation sectors. Our wide range of custom, steel fabricated, off-highway products make it possible to transport resources, assets and personnel to mining sites as well as support site maintenance operations. Designed for use in tough, rugged and remote conditions, our products are crafted from premium materials and are meticulously designed and engineered to meet your needs.

As Indonesia's pioneer in engineered transport equipment manufacturing, we are committed to delivering innovative, top-of-the-line, custom engineered products for you. Our extensive lineup of industry-leading hauling equipment and supporting units are designed, engineered and built for performance and maximum productivity with quick delivery times to keep your operations running smoothly.

Keeping into account your inventory, on-site conditions, and road conditions, our custom engineered products are designed for maximum efficiency to meet your tough demands. We strive to create and deliver the most effective and efficient solutions to maximize your productivity. Our products range from coal body dump trucks, side dump trailers, crane trucks, log pole trailers, fuel and lube trucks, water trucks, aerial work platforms, low bed trailers, oil field trucks and as well as more specific products such as our Stellar tire handlers, Isoli recovery trucks and Finn's hydroseeder.

HAULING SOLUTIONS TO MAXIMIZE YOUR PERFORMANCE

A pioneer in the industry, with several first-to-market products, PRU continuously strives to push the limits of possibility. Our hauling solutions are meticulously engineered and manufactured to meet rigorous demands on-site. Our engineers work tirelessly to innovate new products and improvements to exceed the boundaries of performance and reliability for your projects.

PRODUCTS

Coal Body - 32 / 35 / 42 / 45 / 48 m³
Nickel Body
Scow End/Rock Body - 15 / 18 / 24 m³
Side Dump Trailer - 75 / 90 / 110 m³
Double Side Dump Trailer - 220 / 235 / 260 m³
End Dump Trailer - 18 m³

As the first company to develop bottom dump trailers, 45m³-capacity coal body and side-dump trailers, PRU consistently strives to revolutionize and extend the limits of efficiency and reliability. Our superior-grade, robust, and durable hauling equipment are designed to keep up with the demanding needs of your operations.

Our side dump units feature wider axle track length, lightweight design, and are made with high-grade materials for added maneuverability, capacity, and durability to support your hauling activities. In addition to use in coal hauling, we also design our products for use in nickel and mineral hauling operations.

Our engineers collaborate with contractors to design and develop new features and extensions to current products to stay at the leading edge of innovation and maximize your productivity.

MINING SUPPORT TO KEEP YOU RUNNING SMOOTHLY

PRU's extensive lineup of supporting units are designed to keep your mining operations running as smoothly as possible. With units for road maintenance, equipment maintenance and recovery vehicles, we strive to give our customers the best, most effective products for their mining and infrastructure maintenance needs.

Our support equipment range from fuel trucks to keep your machinery running, water trucks for dust maintenance, as well as crane trucks for your lifting needs, high performance tire handlers that enable you to change tires in the pit, lube trucks to keep your machines running smoothly and recovery trucks for when your equipment needs a helping hand.

PRU is the region's sole supplier for Stellar Industries, based in Iowa, USA-the world's only manufacturer of truck-mounted tire handlers. PRU also serves as an agent for Isoli S.p.A., manufacturer of recovery and defense trucks and aerial work platforms, based in Fontaniva, Italy.

PRODUCTS

- Crane Truck - HIAB / EFFER / PM Crane / Tadano
- Fuel Truck - 20 / 32 / 35 / 40 KL
- Water truck - 35 / 40 KL

Unleash Power and Performance for Off-The-Road Applications.

Designed for rugged terrains and demanding environments, the Stellar 23000 OTR is a heavy-duty tire handler that combines exceptional lifting capacity and maneuverability. With its robust construction, advanced features, and precise control, this industry-leading equipment ensures efficient tire handling operations in mining, construction, and other off-the-road industries.

Featuring a 315-degree crane rotation, the Stellar 23000 OTR provides versatility and flexibility in positioning. With a crane rating of 31.8 tons, it offers substantial lifting power to tackle the heaviest of loads. Its impressive max horizontal reach of 16.5 ft and max vertical lift of 25 ft allow for seamless tire handling even in challenging locations.

With a lifting capacity of 23,000 lbs at 10', the Stellar 23000 OTR is engineered to handle heavy-duty tires with ease. Whether you're dealing with large-scale mining operations or construction projects, this tire handler is the ultimate choice for tackling the toughest challenges.

Experience the pinnacle of reliability, productivity, and efficiency with the Stellar 23000 OTR. Unleash its power and performance to revolutionize your off-the-road tire handling operations.

The Largest Truck-mounted Handler available Worldwide

Introducing the Stellar 28000 OTR, the epitome of power and performance in tire handling. With its superior lifting capacity of 28,000 lbs at 10', this heavy-duty tire handler surpasses expectations and takes on the most demanding off-the-road applications with ease. The 315-degree crane rotation and extended reach capabilities make maneuvering effortless, ensuring efficient tire handling in any work environment. Built to withstand rugged terrains and harsh conditions, the Stellar 28000 OTR combines durability, advanced features, and precise control to deliver unparalleled results.

Compared to its counterpart, the Stellar 23000 OTR, the Stellar 28000 OTR offers even greater lifting capacity and extended reach capabilities. With a higher lifting capacity and enhanced maneuverability, this tire handler enables you to tackle heavier loads and access tires in hard-to-reach areas with confidence. Its robust construction, combined with advanced safety features, maximizes productivity while minimizing downtime. Experience the next level of tire handling excellence with the Stellar 28000 OTR, setting new industry standards and surpassing all expectations in off-the-road equipment.

Double Side Dump Truck

SERVICE SUPPORT

PEACE OF MIND FOR EVERY OPERATION

At PRU, we understand that keeping your trucks running smoothly is essential for your business success. That's why we offer comprehensive service support to ensure your fleet operates at peak efficiency. Whether you need routine maintenance, unexpected repairs, or roadside assistance, our team of experienced technicians is dedicated to keeping your wheels turning.

PRU provide a full range of services, including:

- **Preventative maintenance:** We offer scheduled maintenance programs to identify and address potential issues before they become major problems. This helps you avoid costly repairs and unexpected downtime.
- **Parts and supplies:** We stock a wide range of parts and supplies to ensure repairs are completed quickly and efficiently. This minimizes downtime and gets your drivers back on the road as soon as possible.

SPAREPARTS

GET BACK ON TRACK, FASTER.

HYVA

HYVA Tipping & Gate Cylinder

PRU side dump trailers utilize HYVA DA130/60-1220-K1680 gate and HYVA 200/90-1705-K2150 tipping cylinder. HYVA double acting telescopic cylinders are lighter and deliver faster tipping due to the reduced surface area between tubes.

HYVA Seal

These kits contain all the necessary seals to prevent leaks and ensure optimal performance in your hydraulic system, reducing downtime and keeping your operation running efficiently.

HYVA Return Filter

It removes contaminants from the hydraulic oil, protecting your equipment and ensuring reliable performance. Choose from standard or high capacity options to fit your needs, and find the perfect fit with easy-to-install elements and clear instructions.

HYVA Typing Valve

This spare part is specifically designed for Hyva hoist systems, ensuring a perfect fit and reliable performance. The Hyva tipping valve offers precise control over the dumping process, maximizing efficiency and safety on the job.

HYVA Gear Pump 2035

This genuine Hyva product ensures a perfect fit and delivers the power you need for efficient hydraulic operation of your tipping mechanism. Don't settle for compromises, trust Hyva for superior quality and keep your truck on the job.

HYVA Gear Pump 2030

Keep your dump truck operating smoothly with the Hyva 2030 gear pump, a reliable replacement part for your hydraulic hoist system. This high-quality pump ensures efficient lifting power, minimizing downtime and maximizing productivity on the job.

VICKERS

Vickers Seal Kit

The reliable solution for repairing leaks and maintaining optimal hydraulic system performance. These high-quality kits contain all the necessary seals to restore worn components in your Vickers pumps and motors, ensuring extended service life and preventing costly downtime.

CORKEN

Corken PZ10

Corken has been in business for over 90 years and is known for its high-quality products and excellent customer service. The company's products are used in a variety of industries, including the oil and gas, chemical, and transportation industries.

**LIQUID
CONTROLS**
Lc
EUROPE

Liquid Control M10

Need a dependable workhorse for accurate liquid transfer? Look no further than the Liquid Control M10 flow meter. Renowned for industry-leading accuracy and durability, the M10 handles high-volume transfers of fuels, oils, and even antifreeze with ease.

PRU

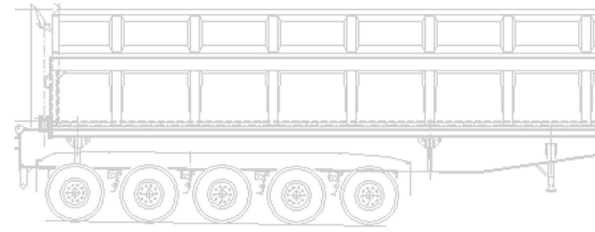

PRU Rim

Our parts are built tough to handle the demands of heavy-duty hauling, keeping you rolling safely and efficiently.
